Adapta2

TECHNICAL DATA

- **Operational / managerial programme**
- **Operational / managerial / meeting / presentation tables**
- **Filing system**

The new system ADAPTA2 offers a stylish solution and has been designed according to the latest trends in working space organization. The design of the legs as a closed frame, the new finish and the auxiliary modules lend the new series a very advanced architectural look.

DESKTOPS	
Coating	Melamine or high pressure stratified lamination, phenolic board, white laminated glass, or natural varnished wood veneer.
Interior	High density or phenolic chipboard.
Thickness	30 mm melamine over high density chipboard, 30 mm sheets over high density chipboard, 12 mm phenolic board, 13 mm laminated glass and wood veneer over 28 mm chipboard.
Sides	Made from 2 mm PVC.
FRAMEWORK	
Material	Metal frame.
Coating	Epoxy powder paint 80 microns with preliminary phosphate antioxidant.
Legs	Manufactured in tubes and 1.5 mm steel sheets. Simple legs, doubles for bench style and intermediate legs. End legs have an integrated vertical electrifiable system. Legs in chromium plating as optional.
Cable management system	All the tables have a support structure with wire management solutions.
MODESTY PANEL	Options: Melamine, phenolic and natural wood veneer options.
DESKTOP SCREEN	Options: Melamine, phenolic and methacrylate.
DRAWER CABINETS	The ADAPTA2 series is compatible with the various JG drawer cabinet systems.
HANDLES	Specific design for the series made of Zamac.
PACKAGING	Tops are packaged in a layer of cardboard, honeycomb style cardboard corner pieces, plastic bubble wrap and 30 micron shrink wrap plastic. Metallic drawer cabinets are packaged in cardboard boxes, corner pieces on the top and a plastic bag. Accessories and legs are packaged in cardboard boxes.
CERTIFICATIONS	Cidemco mark of quality (request), Sustainable forests, ISO 9001-2000, ISO 14001-2004
