MAINTENANCE, QUALITY AND **ECOLOGY**

Our company has the quality certification ISO 9001 and TECNALIA for years, institution that verifies and standardizes raw material and compliance with European norms applicable to office furniture.

Regarding to environmental policy, our company has implemented and certified all the measures contained in the ISO 14001 and ISO 14006, and also supplies by demand the forest certification of chain of custody for PEFC and FSC systems, ensuring that the wood used comes from sustainable forest management. Compliance with these standards facilitates obtaining LEED points with our products.

The most appropriate method to clean our furniture is to use a clean microfiber cloth, slightly moist with water, without any additional cleaning products. If some dirt is rather difficult to remove, use the same microfiber cloth or a 100% cotton one slightly moist with water and a little neutral soap or window-cleaning fluid (except natural wood). Then, dry the furniture with another soft, dry cloth. All the products that contain ammonia, caustic or solvent products are not recommended at all.

The cleaning products made specifically for furniture usually contain substances like wax to enhance the shine of natural wood surfaces that has been damaged by use and are timeworn, but such substances can give the furniture a greasy look and cause irreversible effects on it. Therefore these are also not recommended.

RECYCLABLE

The components in our furniture are easy to separate out and recycle.

USE

Our products are ergonomic and safe for users.

PRODUCTION

Production processes that are environmentally friendly.

MATERIALS

Recycled materials and secondary metals.

TRANSPORT

We minimise the impact of transport and packaging on the environment.

MATERIAL	RECYCLING
ABS	Very good
Melamine coated chipboard	Good
Polyamide	Good
Zamak	Very good

Regulations

- Folding tables: UNE-EN 14073-2:2005 / UNE-EN 14073-3:2005 / UNE-EN 14074:2005.
- Materials: Technical specifications prescribed by TECNALIA.
